ATYPON

Build the technology that publishes **the world's most important content**

Atypon makes a difference —and so will you

Atypon technology furthers science, technology, medicine, and engineering, and our online platform powers the most prestigious scientific publishers in the world. The work you do will directly support researchers and scientists in game-changing discoveries and world-changing knowledge

WHAT WE DO

Atypon develops software for delivering the world's most important content to the people who need it most. Our clients are renowned international publishers of everything from breakthroughs in medicine to the latest frameworks in computer science—the game-changing discoveries and world-changing knowledge that advances humanity..

WHAT YOU'LL BE WORKING ON

Our flagship product is a SaaS publishing and website development platform called Literatum. It gives our clients easy-to-use tools for creating and maintaining complex publication websites.

“Our engineers tackle and solve challenging problems. When I joined Atypon I was impressed by the caliber of my colleagues. We truly attract the top people in the field.”

—PATRICK HARGITT, PRODUCT MANAGEMENT DIRECTOR

R&D AND NEW PRODUCTS

Atypon's R&D efforts involve new applications of machine learning and natural language search. And we're developing a comprehensive suite of tools for every step of a researcher's scientific journey, from content discovery and writing papers to submitting them for publication.

“Atypon is as local as it is global. We have the warmth of a small business and the high-tech software engineering challenges of a worldwide company.”

—NATALIA BAXEVANOU, SOFTWARE QUALITY ANALYST

Advance your career at Atypon

WE'RE SERIOUS ABOUT SOFTWARE

We rival larger Silicon Valley companies in our aggressive pursuit of new technologies: our engineering and R&D teams comprise more than two-thirds of our staff.

WE WANT YOU ON OUR TEAM

We employ over 440 team members in 11 offices and development hubs around the world. You'll collaborate with and meet software engineers and solution architects in California, New York, the UK, the Czech Republic, and Jordan. Our team in Athens numbers nearly 100—and it's our fastest-growing office.

EXCEPTIONAL CLIENTS SUPPORTED BY AN EXCEPTIONAL TEAM

We're the undisputed leader in our industry, with more than 200 clients, including some of the largest publishers in the world and the most prestigious research publications in every discipline.

WORLD-CLASS ENGINEERS BUILDING WORLD-CLASS SOFTWARE

At Atypon, we know that extraordinary engineers develop extraordinary software, and satisfied employees make for satisfied clients. We seek out the best talent and ensure that they get the technologies and work environment they need to do their best work.

ATYPON

Love
what
you do

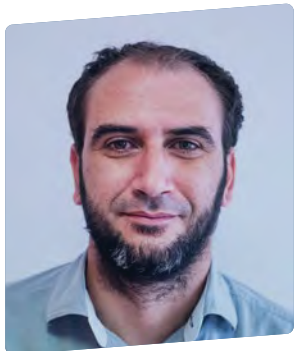

DEVELOP SOFTWARE, NOT VAPORWARE

Our software has been in continuous development for over 20 years. It's not just a theory or an idea—it is used by millions of scientists every day.

LIVE IN ATHENS. WORK IN SILICON VALLEY.

Atypon was founded in Silicon Valley, where we're still headquartered, and we have deep roots in Greece: our CEO, himself a computer scientist, is a native of Thessaloniki, where we also have a development hub. So we like to say that we have the best of both worlds to offer: the nimble ethos of a Silicon Valley startup and the stability of a well-established industry leader.

“We have a lot of freedom to innovate. If there's a new technology or way of doing something, people want to hear about it, and if it works, it gets implemented.”

—CHARIS ARAPIDIS, CMS SENIOR SOFTWARE ENGINEER/ARCHITECT

What's it
like to
work here?

WE'RE A TEAM. FOR REAL.

Everyone may say it, but at Atypon, it's true. Atyponers are crazy smart—many of us have advanced degrees in our fields. We're creative, collaborative, and fun to work with. After work, you can often find us out together, enjoying one another's company and sharing ideas.

SECURE YOUR CAREER

We've grown from 4 people to 440 since we were founded 23 years ago. And we're going strong. Since 2016, we have been part of Wiley, a 200-year-old American company and one of the largest publishers in the world.

“It's great to know that our software is used by the world's most prestigious publishers. I felt proud when I found out a friend's research had been published on our platform by an Atypon client .”

—IRENE ATHINEOU, BACK-END SOFTWARE ENGINEER

Who are

MACHINE LEARNING/BIG DATA ENGINEERS

You'll work alongside machine learning researchers to design, develop, and deploy algorithms, systems and data pipelines that process and analyze data for AI-powered text mining, information retrieval, similarity analysis, and recommendation services. We build high-performance services on top of Big Data management technologies such as NoSQL back ends and Lucene-based search engines like Solr and Elastic Search. And you'll work on distributed processing and data streaming platforms such as Apache Spark, Angel parameter server, and KAFKA.

BACK-END JAVA DEVELOPERS

You'll work with other top-tier engineers on our content back-end team to solve complex problems such as how to optimize storage algorithms, update content stored in clustered distributed caches, and build complex content transformation jobs in a distributed back-end parallel-processing highly available workflow.

“My colleagues are exceptionally smart and always willing to exchange ideas, so we all learn from one another.”

—DESPINA KASTANI, SOFTWARE ENGINEER, UI TEAM

we hiring?

DEVOPS ENGINEERS

Our DevOps team builds and scales new services using a K8 deployment infrastructure and migrates existing services to it. You'll collaborate with our development teams around the globe—from Amman to Silicon Valley.

SOFTWARE ENGINEERS IN TEST

You'll shape the future of Atypon's core content platform CI/CD workflows with modern DevOps tools, and work with product managers, QA analysts, and other software engineers to ensure the quality of our products. And you'll also get to explore cutting-edge testing tools and methodologies.

TECHNICAL PRODUCT MANAGERS

Every product manager functions as a mini-CEO, leading the creation and implementation of new products from concept to market. You'll own all product rollout phases, from market research and ideation to prototyping, from solution architecture to software implementation. And you'll work directly with our customers to ensure our products meet their needs.

“At Atypon, we don't feel like employees. We think of ourselves as craftsmen and artists, and Atypon values what software engineers do.”

—EMMANOUIL SYNODINOS, CMS SOFTWARE ENGINEER

We're hiring!

Back-end Java Developers
Software Engineers in Test
Machine Learning Engineers
DevOps Engineers
Big Data Engineers
Technical Product Managers

IF YOU VALUE...

- A sensible work/life balance
- A 23-year-old company with the heart of a startup
- An easy-going workplace filled with hard-working colleagues
- Quality results more than rigid processes
- The freedom to try out new ideas and technologies
- A company whose clients include the world's largest publishers

...then you should come work with us
