Creating a New Webpage with Page Builder

A step-by-step guide for Literatum publishers

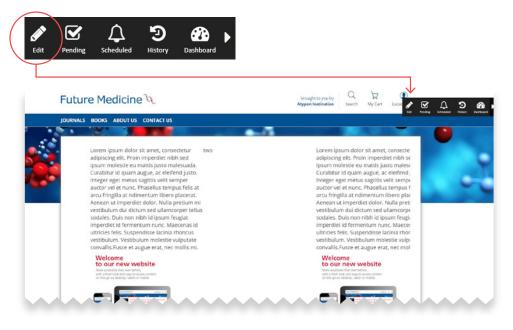

This 8-step guide shows you how to use Page Builder to create and design a new webpage; add images, text, and ads; populate it with topical content; sort that content by relevance; and schedule it to go live on your site. This example creates a new topic-based landing page in response to a breaking news story. The same approach is used to create a page for promoting a product, an event, or existing content.

Create a new webpage.

- 1.1 Log in to your website as an admin and add a new path to the site's URL. For example, if the site domain is your-domain.com, type your-domain.com/new-page.
- **1.2** Click "Enter" to navigate to this new page.
- **1.3** Type the name of an existing page template in the Page Group and Page Template text fields. This will be used as the basis for the new page. (Your Account Manager can provide you with a list of the templates for your site.) Then click "Create page."

	Page not found
	The Page you requested does not exist. You can create a new page using the form below. Page URI:
New path name	/new-page
•	Page hidden
	Page template:
	Page Group
Template name	Custom Page
	Page Template
	Sub-Template
	Visibility Options
	This page will be available on:
	This website only vww.futuremedicine.com
	Indexing Options
	Index this page
	Weekly
	O Do NOT index this page
	Page Redirect:
	Redirect to URL:
	Enable delay before the redirect: Delay in seconds
	2
	Back Create Page

1.4 You will see the existing page template, with the Page Builder menu at the top right. Click on the "Edit" icon.

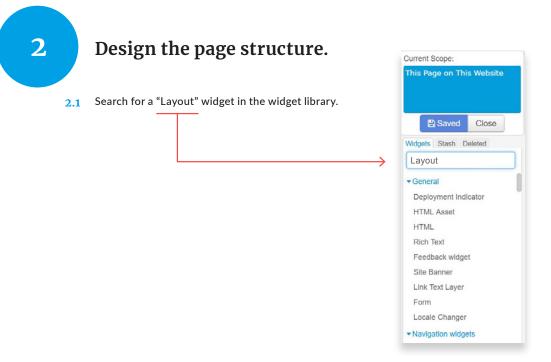

1.5 You will be asked to define a scope, or a set of webpages. The page you have just created will appear as the default scope. Click "Edit."

	Select a Scope to Edit	×
	Select one of these scopes or pick a scope manually: Default scope for this page:	
Default scope name —	www.futuremedicine.com /new-page This scope has not been edited before.	
Derault scope name	Other recently edited scopes:	- 1
	 www.futuremedicine.com Static Page The latest edit in this scope: ✓ Published @ 2017-11-29 16:42:15 by Lucas Garcia The following edit was published: Saved @ 2017-11-29 16:42:07 by Lucas Garcia 	
	www.futuremedicine.com The latest edit in this scope: ✓ Published @ 2017-11-22 13:37:39 by Miroz Zerkani The following edits were published:	
	Pick Scope Manually	it

You will see the new page you have created, with the widget menu on the right.

		Q X Cart Lucas Garcia

		HTML, Rich Text
		Feedback widget
		Site Banner
		Link Text Layer
		Form
		Locale Changer
		Navigation widgets
		Expendable list
		Monu Drawer Button

2.2. Drag the widget into the page.

2.3 Drag another Layout widget into the page, below the first widget.

2.4 Click "Edit" in the top right corner of the first widget. In the dialog box that appears, specify the number of columns and the width of each column. Then do the same for the bottom widget.

In this example, the page is 12 units wide. Specify the column widths as follows:

TOP WIDGET: Make the left column 8 units and the right column 4 units. Click "Save." BOTTOM WIDGET: Make the left column 4 units and the right column 8 units. Click "Save."

ayout Widget ×		Layout Widget ×
Properties Style Alternative Template Whapper Editors		Properties Style Alternative Template Wrapper Editors
amber of columns	Specifying	Number of columns
acks on	2 columns	Stacks on
Never +		Navar •
Gutterless		Gutterless

Populate the page with topical content.

- 6.1 Search for "multi search" in the widget library.
- 6.2 Drag it into the page's right column.

6

- 6.3 Click on the "Edit" button at the top right.
- **6.4** Select "Relevance" from the Sorting Options drop-down menu. This will populate the page with content related to the topic specified in step 6.7, below. (Note: The content could also be sorted by "most downloaded," "most sorted," and other criteria.)

ocus on Leukemia	
	Leukemia continues to cause a significant burden on health globally. The is thought to have claimed over 20 million lives to-date, causing 2 million deaths from in 2016 alone. Last November, FDA granted regular approval to ' <i>dasatinib</i> ' for the treatment of pediatric patients with leukemia. The Future Science Group really cares about this cause and we decided to make free until January 2018 all articles related to leukemia that were published in 2017.
